IVAN JAVIER CABEZA GARCES

FULL STACK & BACKEND SOFTWARE ENGINEER (REACT • NODE.JS • NESTJS • TYPESCRIPT)

Cartagena, Colombia | +57 3218816736 | ivandex16@gmail.com | linkedin.com/in/ivancbgz | github.com/ivancbgz

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 4+ years of hands-on experience designing and shipping scalable web applications, microservices, and secure APIs. Highly skilled across the TypeScript ecosystem, specializing in backend architecture (Node.js, NestJS, Express) and high-performance frontend interfaces (React.js, Next.js). Proven track record of optimizing relational and NoSQL databases (SQL Server, PostgreSQL, MongoDB), reducing endpoint latency by over 25%, establishing automated testing pipelines (Jest, RTL with 80%+ coverage), and deploying resilient architectures on AWS.

TECHNICAL SKILLS

- **Backend & Architecture:** Node.js, NestJS, Express, TypeScript, Microservices, RESTful APIs, GraphQL, OpenAPI/Swagger, SOLID Principles, Clean Architecture.
- **Frontend Engineering:** React.js, Next.js (SSR, SSG, ISR), TypeScript, Redux Toolkit, Context API, Hooks, HTML5, CSS3, Tailwind CSS, WCAG (Accessibility).
- **Databases & Caching:** SQL Server, PostgreSQL, MySQL, MongoDB (Schema Design, Indexes, Aggregations), Redis (Caching Strategies).
- **Security & Auth:** JWT (JSON Web Tokens), Role-Based Access Control (RBAC), OAuth, DTO Validation, Input Sanitization.
- **DevOps, Cloud & Tools:** AWS (EC2, S3, IAM, VPC), Docker, Git, GitHub Actions (CI/CD), Terraform (Foundations), Postman, Linux.
- **Quality & Testing:** Jest, React Testing Library, Unit & Integration Testing, Code Reviews, Agile / SCRUM.

PROFESSIONAL EXPERIENCE

SYSNET Ltda — Full Stack Software Engineer (React / Node.js / NestJS / TypeScript) | *Cartagena de Indias, Colombia* | *March 2022 – Present*

- Led end-to-end architecture and engineering of web applications and microservices using NestJS, Node.js, and React.js, delivering stable and maintainable code across production releases.
- Architected and secured RESTful and GraphQL APIs utilizing JWT and Role-Based Access Control (RBAC), cutting critical endpoint response latency by over 25%.
- Modeled and tuned database schemas across SQL Server and MongoDB, implementing indexing strategies, pagination algorithms, and Redis caching for datasets exceeding 100K records.
- Instituted automated testing suites using Jest and React Testing Library, maintaining unit and integration test coverage above 80% and drastically reducing regression incidents.
- Boosted frontend client performance via Next.js SSR/SSG, code splitting, and memoization, substantially improving Largest Contentful Paint (LCP) and Core Web Vitals.
- Streamlined deployment velocity by creating automated CI/CD pipelines with GitHub Actions and Docker containerization, ensuring development-to-production environment parity.
- Collaborated proactively within distributed agile squads (Product, UX/UI, QA) adhering to SCRUM ceremonies, transforming business goals into deliverable technical increments.

EDUCATION & CERTIFICATIONS

- **Analysis and Development of Information Systems** — SENA (National Learning Service) | Aug 2020 – Dec 2022
- **Architecting Solutions on AWS** — Authorized by Amazon Web Services (via Coursera) | Oct 2026
- **Specialized Engineering Tracks:** Enterprise NestJS Modular Architecture & Production Full Stack Next.js Applications.
