# IVÁN JAVIER CABEZA GARCÉS

**Full-Stack Engineer | React • Next.js • Node.js • NestJS • TypeScript**

Cartagena, Colombia (Remote) • English: B2+ Professional • +57 3218816736
ivandex16@gmail.com • linkedin.com/in/ivancbgz • github.com/ivandex16

## PROFESSIONAL SUMMARY

Full-Stack Engineer with over 4 years of experience building scalable production web applications, database architectures, and secure RESTful backend services. Specialized in TypeScript across modern frontend interfaces (React.js, Next.js) and modular backend services (Node.js, NestJS, Express). Proven background at SYSNET contributing to full-stack engineering across procurement and inventory ERP modules, designing omnichannel medical scheduling APIs channeling thousands of appointments (WhatsApp/Web), and maintaining clinical records systems with ACID persistence in PostgreSQL and SQL Server over 50,000+ transactional records. Creator of AI-powered web applications (Google Gemini API), completed two AWS courses on Coursera (AWS Cloud Technical Essentials, Architecting Solutions on AWS), with robust containerized CI/CD practices (Docker, GitHub Actions).

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js (App Router, SSR/SSG), TypeScript, JavaScript (ES6+), Redux Toolkit, Context API, Custom Hooks (useForm), Dynamic Forms, Tailwind CSS, Responsive UI, Web Accessibility (WCAG).
**Backend & APIs:** Node.js, NestJS, Express, TypeScript, RESTful API Design, GraphQL, Microservices, Clean Architecture, SOLID Principles, OpenAPI/Swagger, JWT, Granular RBAC, Input Sanitization.
**Databases & Storage:** PostgreSQL (Complex Queries, Indexing, Stored Procedures, ACID Transactions), SQL Server, MySQL, MongoDB, Redis Caching Strategies, Schema Migration.
**AI Integration & Tooling:** LLM APIs (Google Gemini, OpenAI), Prompt Engineering, Structured JSON Outputs, AI-Native Coding Workflows (OpenAI Codex, Claude Code).
**Cloud, DevOps & Quality:** AWS (EC2, S3, IAM, VPC) · Coursera courses: Cloud Technical Essentials, Architecting Solutions on AWS, Docker, GitHub Actions (CI/CD Pipelines), Git, Linux, Jest, React Testing Library, SCRUM.

## PROFESSIONAL EXPERIENCE

**Full-Stack Engineer — SYSNET Ltda** Cartagena, Colombia | March 2022 – Present

- **Full-Stack Procurement ERP Engineering:** Collaborated on frontend and backend engineering of the procurement and inventory inbound system using React, TypeScript, and Node.js/NestJS, implementing purchase order workflows, dynamic tax calculations, and atomic warehouse stock updates.
- **Enterprise Medical Scheduling API (SIOS):** Architected and deployed an internal Node.js REST API connected to an existing healthcare database (SIOS), enabling real-time appointment booking to channel thousands of patient appointments across client web portals and WhatsApp chatbots.
- **Clinical Records Maintenance & Schema Evolution:** Provided production support and bug resolution for medical records modules, authoring stored procedures while propagating new clinical fields and validation rules across interdependent patient templates for healthcare clients.
- **Relational Data Modeling & ACID Integrity:** Structured database schemas, indexing strategies, and stored procedures in PostgreSQL and SQL Server; implemented strict ACID transactions across inventory tables, optimizing query response times across 50,000+ medical and transactional records.
- **Component Performance & State Isolation:** Built dynamic forms in React with custom hooks (useForm) and memoization (React.memo, useCallback), preventing unnecessary re-renders and eliminating input latency during high-volume data entry across 30+ input fields.
- **Automated Testing & Containerized Delivery:** Built and executed automated unit and integration tests with Jest and React Testing Library covering critical transaction calculations and healthcare business flows, standardizing Docker CI/CD pipelines under SCRUM.

## TECHNICAL PROJECTS & OPEN SOURCE

**AI-Powered Gym Tracker & Fitness Assistant — Full-Stack App (Personal)** github.com/ivandex16/app-IA-entrenador-gym

- Built and deployed an end-to-end fitness tracking web application using React, Express.js, and MongoDB, integrating Google's Gemini API to generate personalized workout routines and healthy recipe recommendations.
- Implemented live-timer workout logging, shareable weekly progress cards, an exercise directory with video demos, and an onboarding tour for first-time users.

## EDUCATION & COURSE CERTIFICATES

**AWS Cloud Technical Essentials** — Amazon Web Services / Coursera (Credential: 7XO0AMYVIXOK) November 2025
**Architecting Solutions on AWS** — Amazon Web Services / Coursera (Credential: Z3T5AYWSF9WF) October 2026
**Information Systems Analysis & Software Development (ADSI)** — SENA, Colombia 2020 – 2022

## LANGUAGES

**Spanish:** Native | **English:** B2+ Professional Working Proficiency (Technical & Conversational)
